KITTELSON & ASSOCIATES

We solve complex transportation problems to improve people's everyday lives.

Kittelson & Associates, Inc. is a transportation engineering and planning consulting firm that partners with public agencies and private organizations to solve complex problems through research, planning, operations, and design. transportation systems. Whether we're recommending improvements for a single intersection or helping communities plan for technologies of the future, we love tackling transportation challenges through planning, operations, design and research. We're a diverse, interconnected group of people working nationwide and operating as "one office in many locations."

OUR SERVICES

PLANNING

We craft holistic solutions for all modes—supporting livable, economically competitive communities.

OPERATIONS

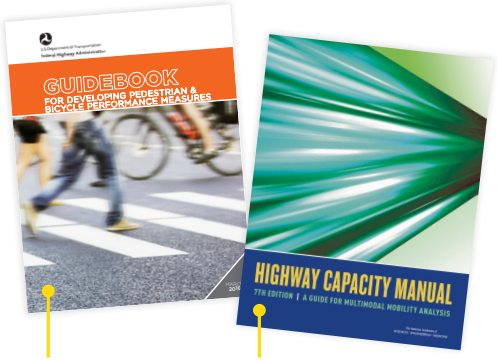
Our experts design seamless systems that balance the needs of walkers, cyclists, transit riders, and motorists.

DESIGN

We turn concepts into reality with designs that minimize environmental impact and meet long-term community needs.

RESEARCH

Advancing the industry through partnerships, applied innovation, and professional development.



We're committed to raising the bar in transportation. We've actively contributed to local, regional, and national research—authoring many of the manuals and guidance documents that shape the profession. And we don't just write the standards—we apply them every day to deliver innovative, practical solutions.
