

## ENGINEERING BEYOND THE PAVEMENT:

### Pioneering Innovative Solutions for Traffic & Transportation

At Carroll Engineering Corporation, we take pride in delivering innovative traffic and transportation solutions designed to meet the evolving needs of communities throughout the Mid-Atlantic. As a respected leader in the engineering industry, we're committed to improving mobility, safety, and sustainability across our region.

#### Why Partner with Carroll Engineering?

Collaborating with Carroll Engineering means working with a team that's fully invested in your project's success. Our deep expertise and client-first approach ensure we understand and address the unique challenges of every project.

- **Proven Track Record** – Over 50 years of successful project delivery across the region.
- **Client-Centric Approach** – Personalized service aligned with each client's specific goals.
- **Innovative Solutions** – Leveraging cutting-edge technology and methodologies.
- **Industry Engagement** – Active involvement in organizations like MASITE keeps us ahead of emerging trends.

#### Expertise & Leadership

Our Traffic & Transportation Department is led by Peter O'Halloran, P.E., PTOE, a former president of the Mid-Atlantic Section of the Institute of Transportation Engineers (MASITE). Peter brings unmatched experience and forward-thinking leadership that has strengthened our reputation for engineering excellence.

### Our Comprehensive Traffic & Transportation Engineering Services Include:

- Traffic Impact Studies
- Transportation Planning
- Safety Studies & Improvements
- Traffic Signal Design & Optimization
- Roadway & Intersection Design
